ONN / GOOGLE TV · STEP 1 OF 10

Open your profile

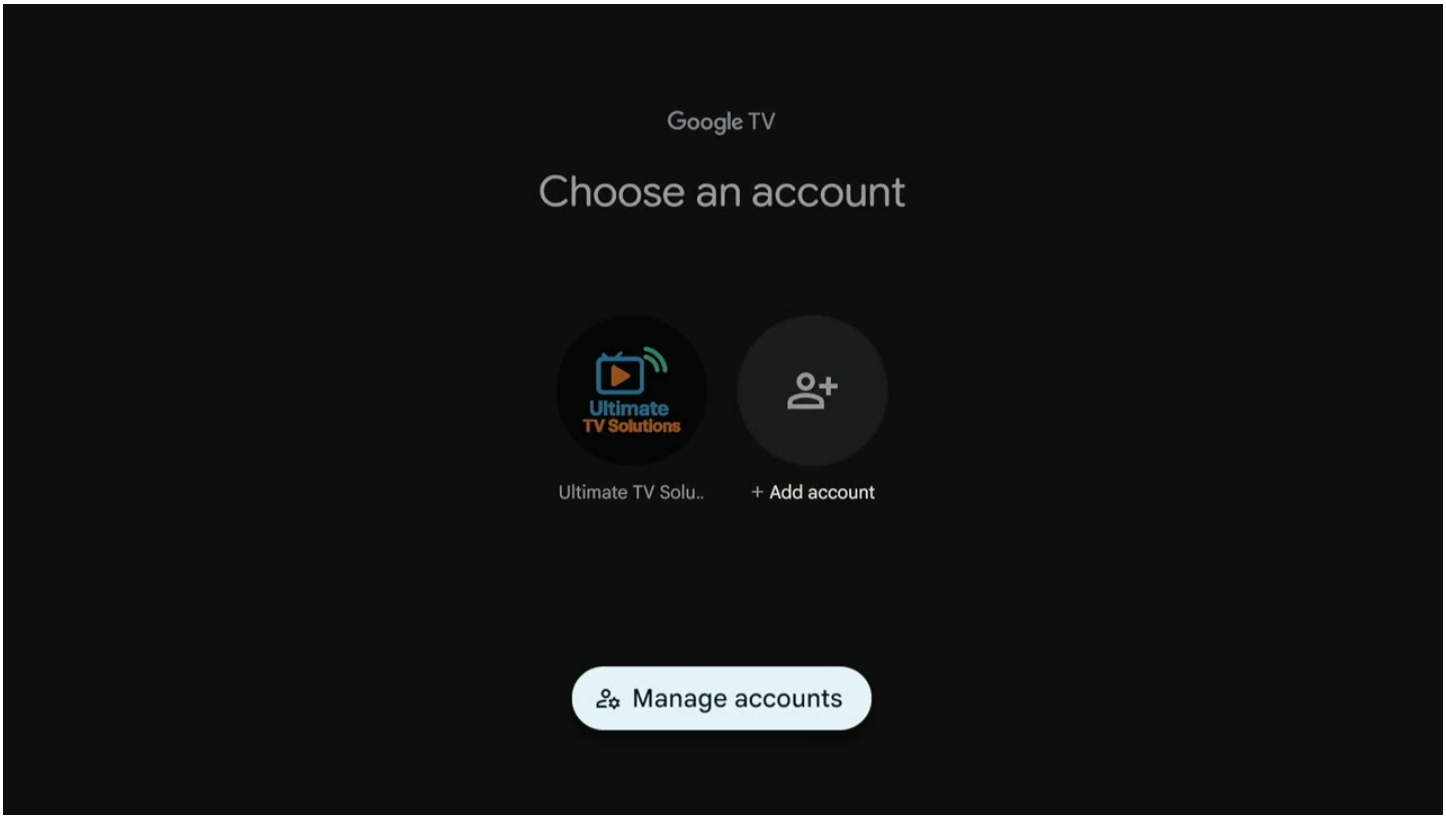

On the ONN home screen, select your profile picture in the upper-left corner.

Keep your current app installed.
Do not delete the old app until the new app is signed in and running.

Choose Manage accounts

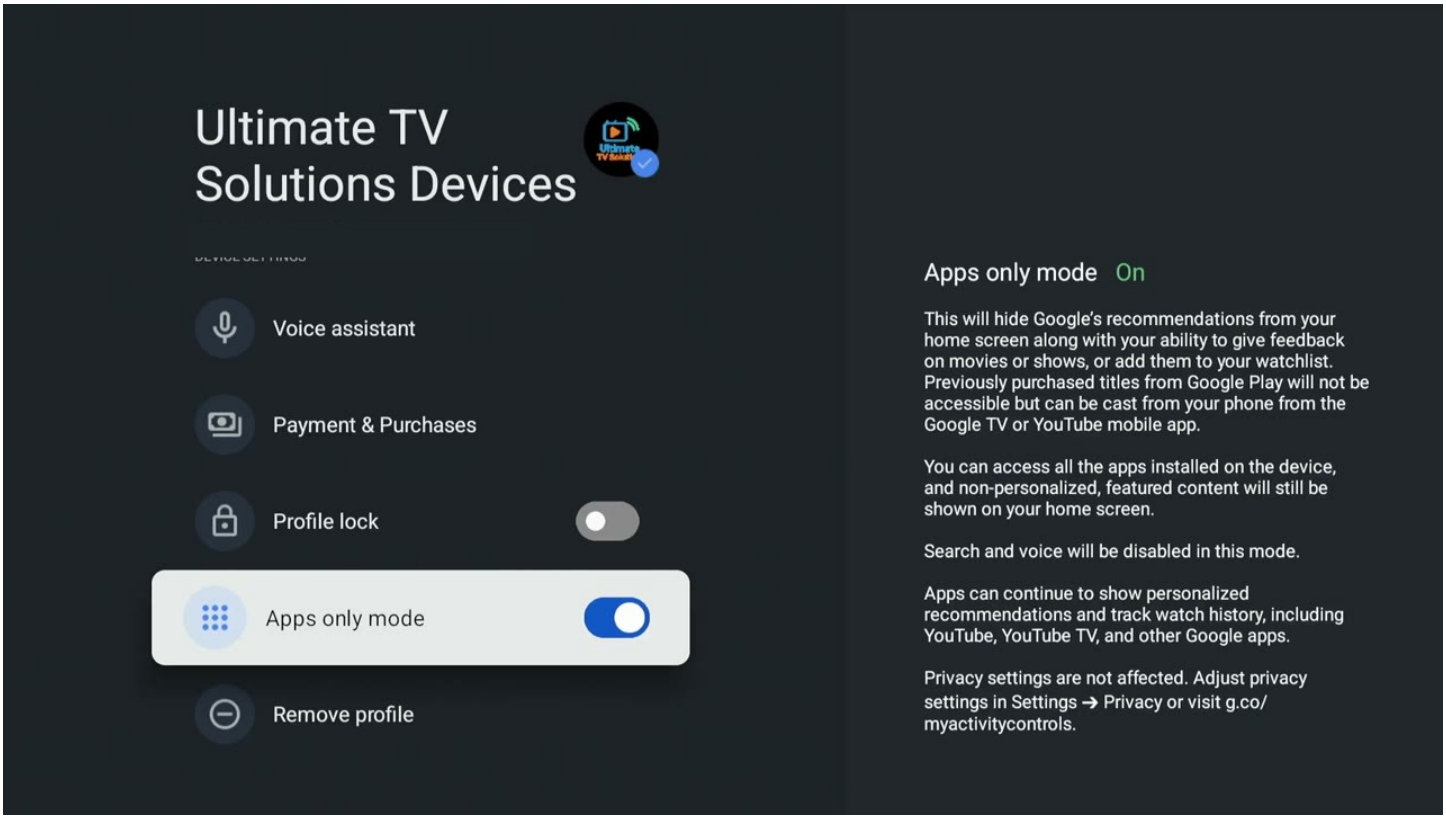

Select Manage accounts. Some devices call this Manage profiles. Choose your current profile; you do not need to remove or add an account.

Keep your current app installed.
Do not delete the old app until the new app is signed in and running.

Turn Apps-only mode off

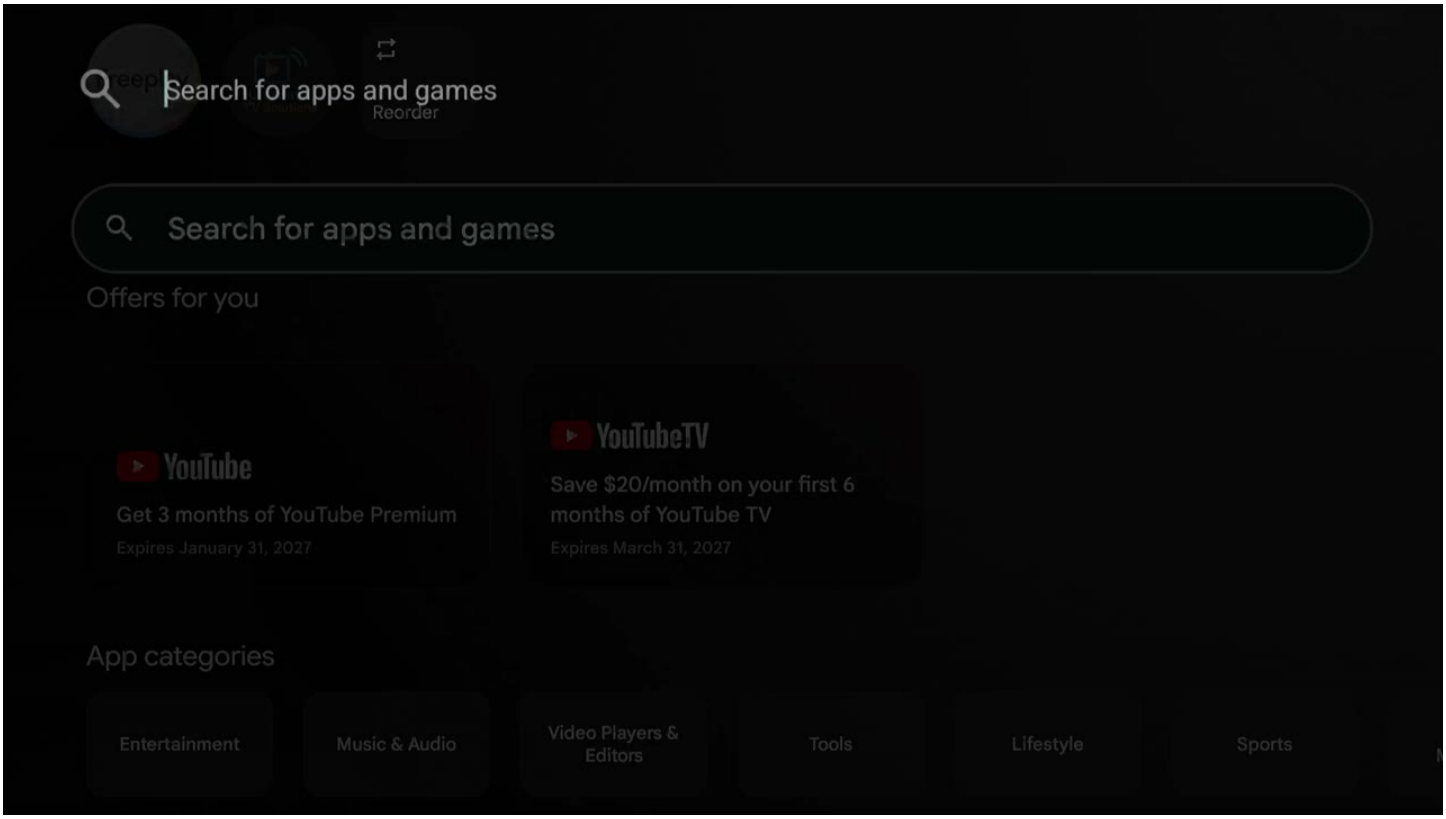

In your profile settings, select Apps only mode and turn it OFF. If it is already off, leave it off. Return to the home screen.

Keep your current app installed.
Do not delete the old app until the new app is signed in and running.

Search for Downloader

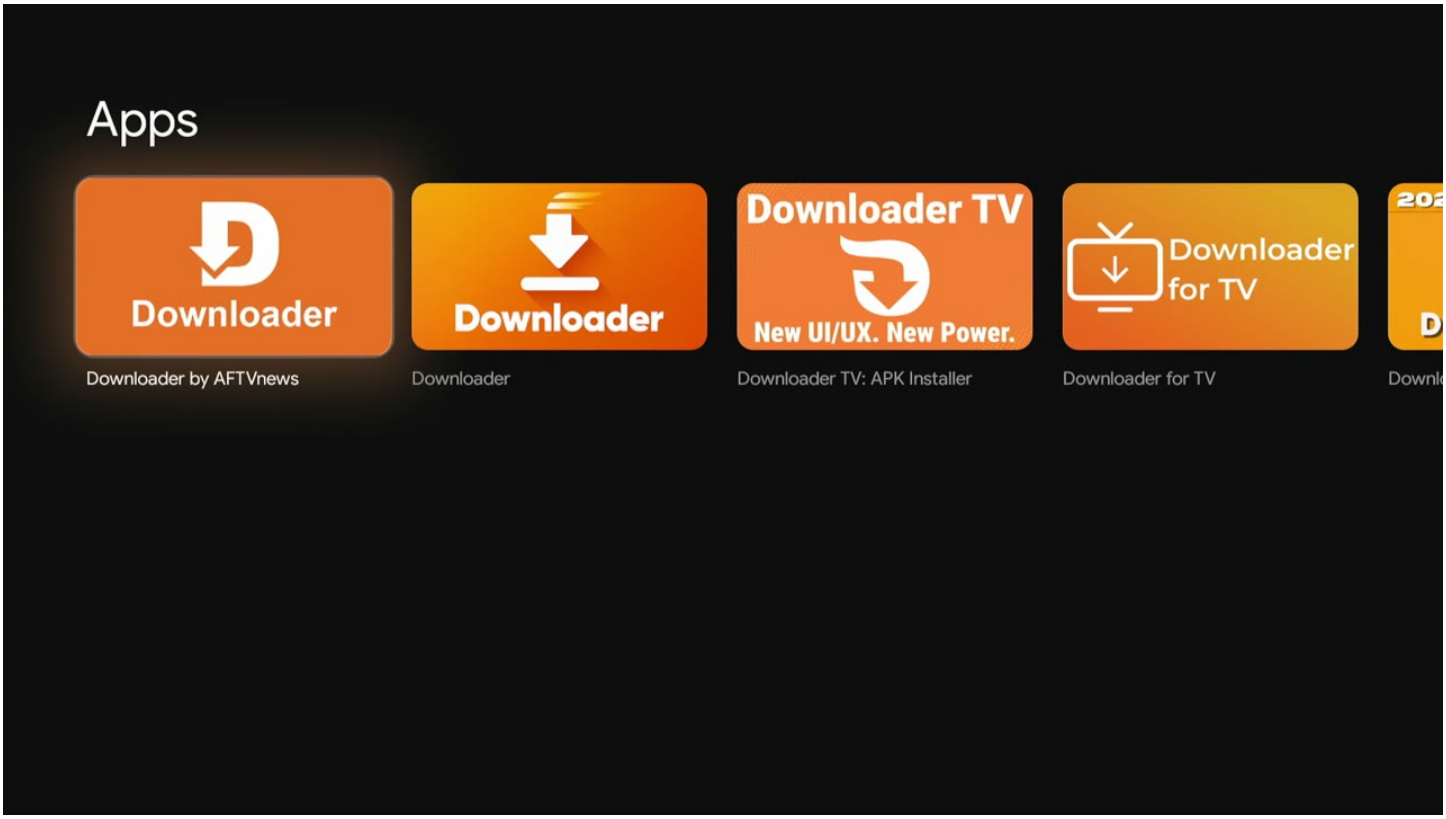

Select Search at the top of the home screen. Type Downloader, or use your remote's microphone to say it.

Keep your current app installed.
Do not delete the old app until the new app is signed in and running.

Install the correct Downloader app

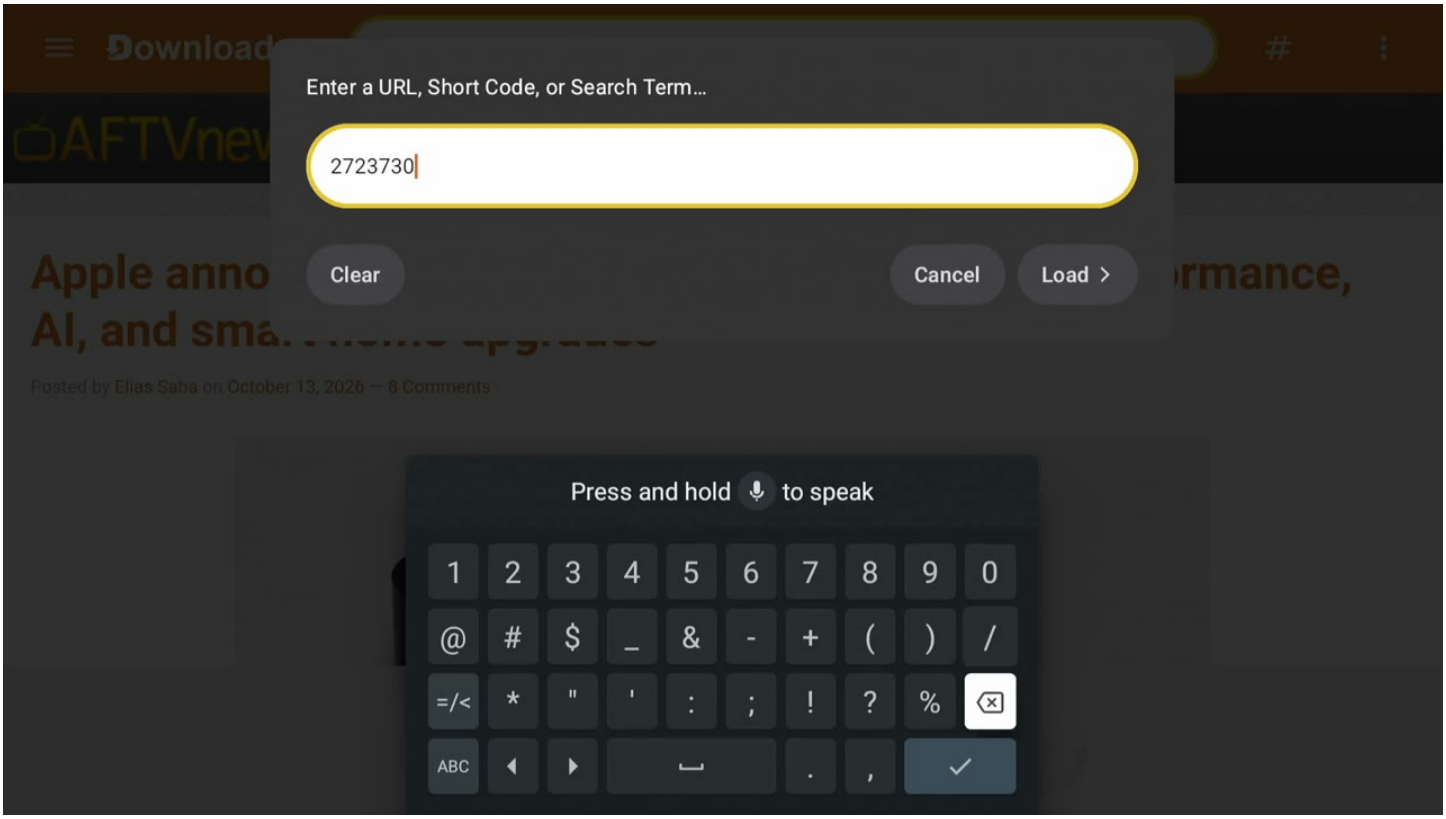

Choose Downloader by AFTVnews—the orange icon with the white arrow. Select Install, wait for it to finish, then select Open.

Keep your current app installed.
Do not delete the old app until the new app is signed in and running.

Enter the download code

In Downloader, select the address bar and enter 2723730. Check all seven digits, then select Go or Load. Wait for the redirect and download to finish, then select Install.

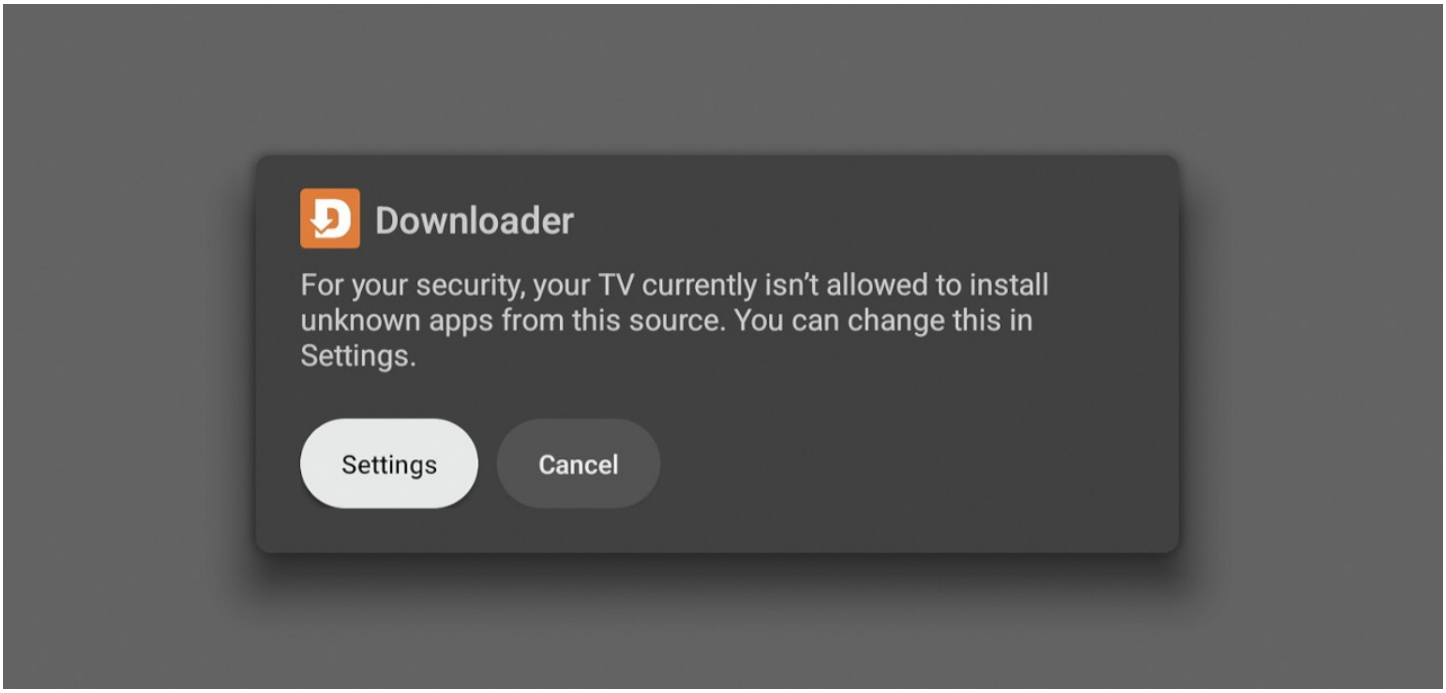

Downloader code: 2723730

Keep your current app installed.
Do not delete the old app until the new app is signed in and running.

Open installation settings

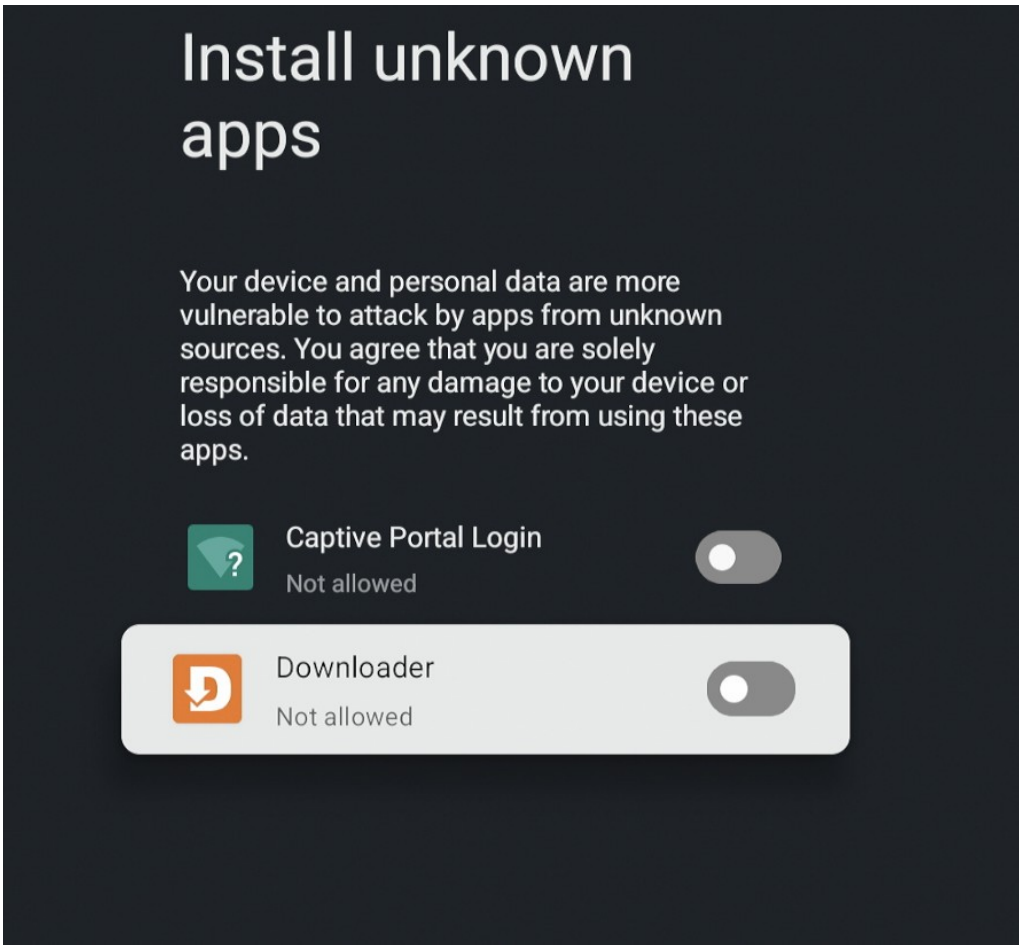

If your TV says Downloader is not allowed to install unknown apps, select Settings.

Keep your current app installed.
Do not delete the old app until the new app is signed in and running.

Allow Downloader, then install

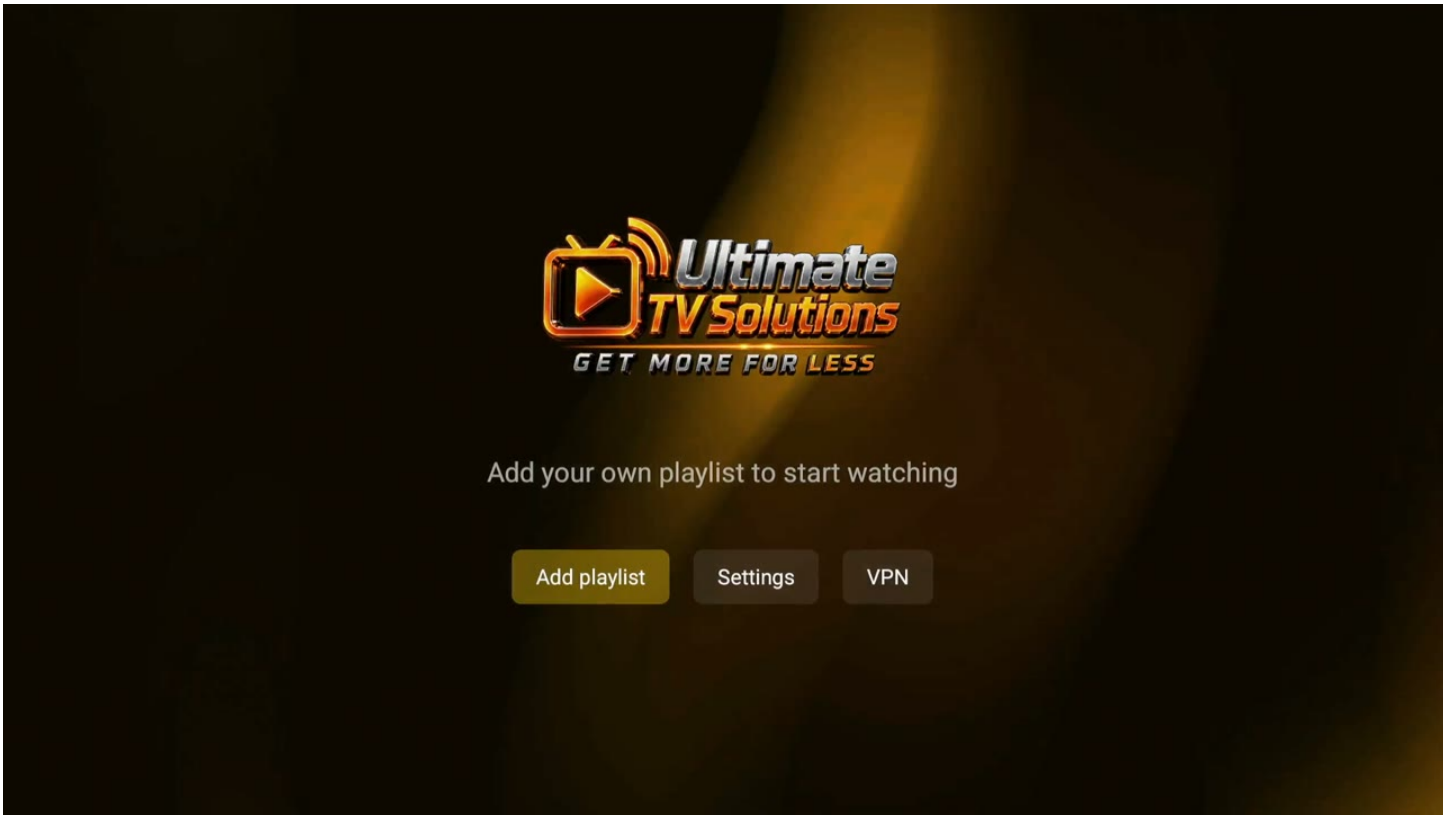

On Install unknown apps, select Downloader and turn its permission ON. Return to the install prompt and select Install for Ultimate TV Solutions. If that prompt does not return, go back to Downloader and select Install again.

Keep your current app installed.
Do not delete the old app until the new app is signed in and running.

Open the app and choose Add playlist

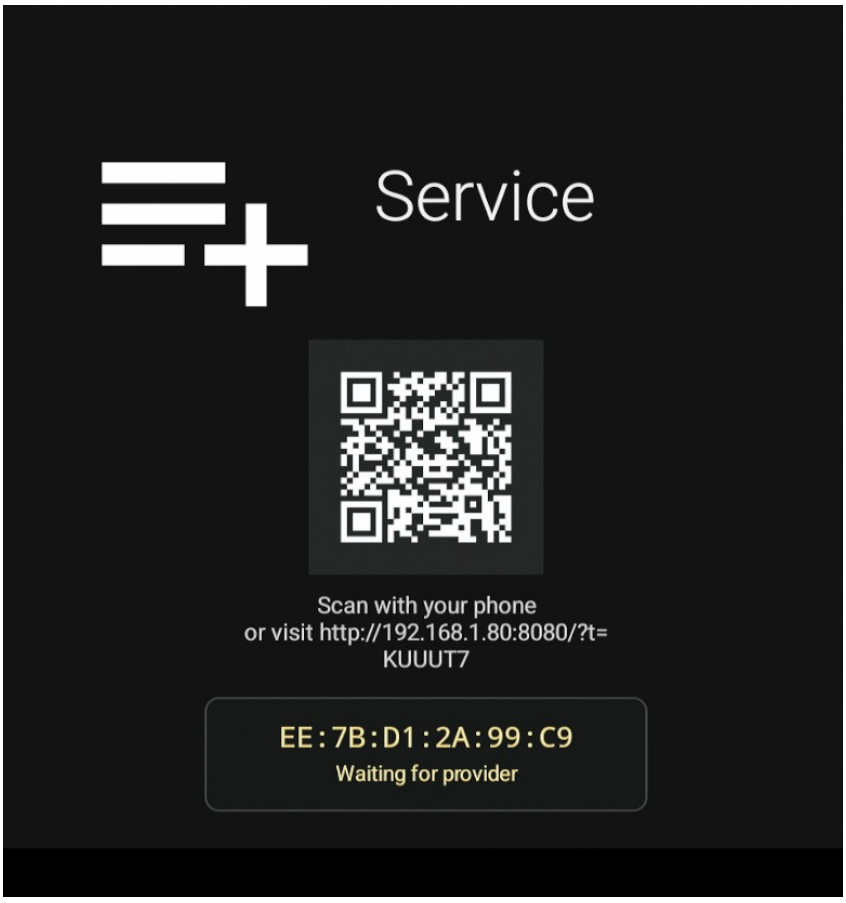

When installation finishes, select Open. On the Ultimate TV Solutions welcome screen, choose Add playlist.

Keep your current app installed.
Do not delete the old app until the new app is signed in and running.

Send us your Service screen

Take a clear photo of the Service screen and send it to Ultimate TV Solutions support. Include the complete MAC address at the bottom—the letters and numbers separated by colons. Every device has its own MAC address. Send yours, not the example below. Your device may say Waiting for provider until support activates it.

EXAMPLE ONLY — send your own device's Service screen.

Keep your current app installed.
Do not delete the old app until the new app is signed in and running.
